# UnzHazmat<sup>®</sup> 5.0

## DOCUMENTATION SOFTWARE

Create, Manage, and Transmit Your Hazmat Documentation with Powerful New Software from Unz & Co.

### CREATE

Master data-entry screens guide you through the form completion process using your database of products, buyers, sellers, forwarding agents, carriers, etc. Select from documents required by DOT, IATA/ICAO, IMDG/IMO, and ERG documents, enter your data, preview, print, and your documentation is complete.

### MANAGE

All shipment information is compiled in your computer's database for later use. Access information for a compliance audit or for use in a new transaction. Transaction data can be easily exported or imported to spreadsheet programs.

### TRANSMIT

It's easy to share information with associates — e-mail, print to paper, print to PDF. Choose the format that works for you.

**\* UNZHAZMAT<sup>®</sup> also includes preparation of mandatory ERG information.**

## Efficient documentation

DOT, IATA, IMDG, ERG and other shipping documents included.

**Create, Manage, and Transmit** Your Hazmat Documentation with Powerful New Software from Unz & Co.

### Create your documents quicker.

The software guides the way to completing a full set of compliant documents.

*The more you use it, the more time you save* because of UnzHazmat's<sup>®</sup> expanding historical database of transactions, customers, products, carriers, vendors, and more.

*Pop-up help keeps you working*, not searching for answers. You will also find a complete glossary of terms and abbreviations built into the User Manual, available from the main menu of the program. Professional documentation has never been easier.

### Manage your documentation with user-friendly database features.

UnzHazmat<sup>®</sup> is rich in features such as pull-down menus including product selections, buyers, sellers and more. They let you work quickly, efficiently, and accurately – access data with just a click.

### Business Integration

Transfer data from your existing UnzHazmat<sup>®</sup> software to spreadsheet programs with a click. Built-in templates allow you to import or export data as the need arises.

Also, *generate shipment, customer, and product management reports* based on your data.

### Transmit your hazmat communications – loud and clear

Unz & Co. experts have been dealing with compliance regulations for years. Regulatory compliance is our driving force. Providing our customers with an easy-to-use tool that takes compliance seriously was a natural next step. UnzHazmat<sup>®</sup> guides you through the entry process to help you produce compliant documents.

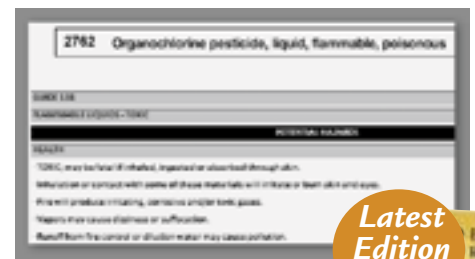

### Print to Paper or E-mail

Print any number of hard copies while simultaneously producing electronic files for distribution to other involved parties. Your *color printer* will generate the IATA forms with the red diagonal hatchings or the IMO declaration with the blue diagonal hatchings. (Optionally, preprinted color bordered paper is available.)

### Generate ERG guides as you complete your documentation!

UnzHazmat<sup>®</sup> software is the first to give you the ability to print out and include emergency responder guides as you print your documentation. A premier benefit considering that: **Mandatory October 1, 2010, in addition to the name of the emergency responder and phone number, the Department of Transportation will require the contract number between the shipper of record and the first responder.** You will no longer have to make copies of ERG guides to be included with your documentation.

*Think of the time you will save!*

**COMPLIANCE:** UnzHazmat® is the only software designed by compliance experts. Unz & Co. has been dealing with compliance regulation since 1879. Providing our customers with an easy-to-use tool that takes compliance seriously was our natural next step. Software prompts and embedded reference information assists you in the completion of each form.

**SAVES TIME:** Reuse existing repetitive data such as customer and product information! Return to your transaction documentation to modify as often as you like — change shipment details or add/delete forms right up to the ship date. You can share drafts through emails or print to paper, and easily export all shipment details to spreadsheet programs. Save time on every transaction!

**GENERATE MANDATORY ERG GUIDES**

as you complete your documentation. UnzHazmat® is the first software to give you the ability to print and include emergency responder guides along with your documentation instead of separately reproducing each guide.

*Generate three detailed management reports based upon your data.*

**Demo version available — @ [www.unzco.com](http://www.unzco.com) or call 800-631-3098.**

**UnzHazmat® 5.0 Forms Include:**

- Emergency Response Instructions
- Hazmat Domestic Bill of Lading (Note: Compliant with DOT 10/01/10 requirement to supply contract number in addition to responder telephone number. Can be used for both hazardous and non-hazardous products)
- IATA Dangerous Goods Declaration
- IATA Non-Restricted Declaration
- IMO Multimodal Dangerous Goods Declaration
- Packing List
- Shippers' Letter of Instruction

**Technical Support**

The Unz & Co. help desk is available for Technical Support. Ninety-day technical support is included with your purchase. Annual maintenance agreements are available.

**UnzHazmat® 5.0 benefits include:**

- First Responder ERG Guide look up and shipping document preparation.
- Preprinted forms are not required.
- Management Reports compiled by customer, product, and shipment data.
- Easy exporting of files to spreadsheet programs.
- Printing options: E-mail, print to paper, or print to pdf.
- Compliant with DOT 10/01/10 requirement to supply a contract number in addition to responder telephone number.

**UnzHazmat® 5.0 — the economical solution to dangerous goods documentation**
